EXAMINER'S AMENDMENT

And

EXAMINER'S REASONS FOR ALLOWANCE

1. Claims 1-18 are allowed.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul W. Bobowiec Reg. No. 47,431 on 5/21/2007.

The application has been amended as follows:

Claim 17, line 8 has been changed from "topologies" to -- topologies. --.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

While *Chang* teaches a noise determination method for determining noise with respect to analyzing a circuit and *Mehrotra* teaches a plurality of circuit topologies and *Chang* teaches an expert system that recommends design changes to a circuit, none of the references taken either alone with the prior art of record disclose, outputting an improvement proposal, specifically including:

(claim 1) "...outputting an improvement proposal from the computer to the user for making the analyzing circuit closer to one of the basic types of the transmission circuit topologies depending upon the analyzing circuit judgement result",

(claim 6) "...to output and improvement proposal to the user for making the analyzing circuit closer to one of basic types of the transmission circuit topologies depending on the analyzing circuit judgement result",

(claim 11) "...to output an improvement proposal to the user for making the analyzing circuit closer to one of the basic types of the transmission circuit topologies depending on the analyzing circuit judgement result",

(claim 16) "...outputting a noise countermeasure improvement proposal from the computer to the user for making the analyzing circuit closer to one of basic types of the topologies based on the comparison",

(claim 17) "...and outputted as a noise counter measure improvement proposal to the user, wherein a transmission waveform of the analyzing circuit differs depending on each of the plurality of transmission circuit topologies...", **in combination with the remaining elements and features of the claimed invention.**

Further and in regards to the claimed limitation, *improvement proposal*, Applicants' specification is clear as to what specifically embodies the claimed *improvement proposal*. More specifically, the specification clearly teaches the definition of the claimed *improvement proposal* in figures 34 and 37 and in the descriptive text on pages 11, 16, 17 and 61-63 of the specification. Clearly figure 34 teaches that the proposal will at least contain a recommendation to either change a driver or change the length of a wire or change a damping resistor or, as

Art Unit: 2123

regards figure 37, move the position of a receiver, provide a terminating resistor or change a driver to one that has a large driving ability. Specifically, as regards the prior art, *Chang* and *Mehrotra* fails to disclose or suggest the specific types of elements as disclosed by the specification definition of the term *improvement proposal*. Finally, it is noted that the Applicants' specifically argued that an *improvement proposal* was not being disclosed by the cited references, see pages 9-11 of the arguments presented on 2/21/2007. The combination of Applicants' arguments, with the instant amendment to claims 16 & 17 and further the specific embodiments presented in Applicants' specification have been sufficient, in combination, to overcome the prior art rejections and are therefore the claims are now allowable over the prior art of record.

3.1 Regarding dependent claims 2-5, 7-10, 12-15 and 18 these claims are allowable for at least the reason they depend upon an allowed base claim.

3.2 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
